gave a banquet this evening, which was attended by six hundred tradesmen, and by Healy, O'Brien, Dillon and other members of the parliament. A number of addresses were made, in which the speakers expressed the belief that home rule would soon be granted Ireland.

Mr. Charles Dilke is going to the south of France, where, it is said, he will sojourn six months. He will not resign his seat in parliament.

THE QUEEN SUFFERS.

MADRID, February 16.—It is rumored that Queen Christina is suffering from the effects of premature childbirth. Her sole attendant is an Austrian physician, Dr. Riedel, the queen refusing to see the doctors attached to the household. The conservatives and the liberal newspapers have been demanding that the Spanish physicians be allowed to attend the queen's achievement.

The reconciliation between ex-Queen Isabella and her husband Francois, was effected through the urgent solicitations of Senor Canovas Del Castillo, who, it is regarded, is preparing to visit the queen.

LONDON, February 16.—M. DePeynehet has informed the earl of Rosebery, minister of foreign affairs, that he has instructed M. Sauray, French minister at Cairo, to support the city, has developed the fact of the existence of the revolutionary conspiracy with ramifications in Barcelona, Malaga, Cordova and Seville. The houses of all suspected persons are being searched by the police.

FRANCE AND EGYPT.

A Combination to Force the English Out of the Country.

LONDON, February 16.—M. DePeynehet has informed the earl of Rosebery, minister of foreign affairs, that he has instructed M. Sauray, French minister at Cairo, to support the

the British commissioner of Egypt, that the British force there be replaced by the Turkish-Egyptian army. The French prime minister made a countermove to Lord Rosebery looking to an agreement between England and France on the Egyptian question. DeFrederick does not pledge that when English occupation ceases, France will not intervene, but will cooperate with England to prevent any other power from interfering in Egyptian affairs.

THE BOSTON FLOODS.

**The Great Mortality Expected to Follow—
The Precautions Taken.**

Boston, February 16.—The water, which, for four days, has covered two square miles of the city in the Roxbury district, has, for the most part, disappeared. Today the water was reduced from thirty to fifty ponds that hold possession of the back yards and fill the depression in the streets. "It is impossible," says Dr. Dixwell, "to approximate the amount of

great mortality in the flooded districts is also expected." The doctors walk all the streets in company with the police and agents of the poor dealing out drugs and cordials to those who need them. Six large furniture wagons loaded with food to their utmost carrying capacity are sent out early each morning. As the day wears on, the team of the team is ordered for the old bath house on Cabot street to be replenished, and again started out on its errand of mercy. About half of the families are still unsupplied. The fund for the distressed now reaches \$6,564.

NEWELL, Mass., February 16.—It is estimated that 5,000 persons have been thrown tem-

Why General Hancock's Body Was Not Cremated.

nated instead of buried, it was thought that he believed firmly in the propriety and sanitary desirability of the new method. Nevertheless he is interred in the Hancock family graveyard. His illness was so sudden and disabling that he could not have expressed a wish on that point, and intimates of Mrs. Hancock say that, as she never could bring herself to regard cremation save with repugnance, the general would not have gone contrary to her sentiment anyhow.

The Lancers in Washington.
WASHINGTON, February 16.—The National Lancers, of Boston, stopped in Washington for a few hours this afternoon on their way to

at the depot by the National Rifles, of this city, and escorted to the whitehouse where they were received by the president. The officers of the regiment were individually presented by ex-Governor Long, and the soldiers marched by the president in single file, shaking hands with him as they passed. The visitors then returned to the depot, and renewed their journey to the south.

Mr. Booth, the Actor, Going to Europe.
NEW YORK, February 16.—The Sun's Newport special says: A sensation has been caused by the announcement that "Boothden," the summer residence of Edwin Booth, the actor,

made professional engagements which will take him away for several years. He is going to the Pacific slope and thence to London and Berlin, and finally will make a long professional visit to Australia. Mr. Booth offered to let her place his daughter, but she has no desire for it.

Charles Lulling Nominated.

SHEBOYGAN, Wis., February 16. —At the republican congressional convention last evening Charles Lulling, of Manitowish, was nominated as candidate for the congressional vacancy caused by the death of Hon. Joseph Kaskin.

SEA ISLAND COTTON.

Its Peculiar Value—How Florida Rivals South Carolina in Its Cultivation.

The raising of sea island cotton has become a leading and immense industry in Florida. It is now just a century since Alexander Bissell planted the first cotton seed on St. Simon's Island in Georgia. Five years later Henry Elliott, of South Carolina, succeeded in raising a profitable crop of Hilton Head Island. It was quite considerable impetus to the industry, and during the next twenty years the cultivation of this species of cotton was pushed with vigor. The sea island, or long cotton, is distinguished from the short staple, or upland cotton, by its clean black seed, as well as by its staple, which is long, strong, fine and silky, suitable for the finest yarns in the manufacture of the most delicate fabrics and yarns which are ever woven into the manufacture of silks and velvets.

In 1860 nearly 30,000 bales of this cotton were raised, but on the whole the area of country that on account of soil and climate was supposed at that time to be adapted to its growth the amount produced did not much exceed these figures for the next quarter of a century. The planters of the sea islands, who seemed to have a monopoly of the entire business, soon accumulated large fortunes, and were distinguished as the most refined, aristocratic and wealthy of all the inhabitants of South Carolina. In 1875 sea island cotton sold readily at forty cents a pound, and stimulated by these prices and by the wealth accumulated by the planters of the sea islands, other planters began to investigate the matter, and it was found that the climate of middle and east Florida was well adapted to its culture.

In 1874 Captain Dudley, of Alachua county, imported a small seed from South Carolina, and after careful attention raised a crop that he sold at fifty cents a pound; a price paid only for the best of sea island at that time. In 1875 the crop reached 26,289 bales, of which 13,156 were from South Carolina, 10,741 from Florida, 1,369 from Georgia and 1,190 from Texas.

Since that time, Florida has become pre-eminently the leading long-cotton state of the south, producing an unequalled staple and a larger crop than all the other states combined. Florida cottons have of late years been growing steadily in favor with the manufacturers and approximated nearer and nearer to the prices of the islands until today the prices of the yarns are buying them in preference to all others, some even to the exclusion of all others. The culture has rapidly extended to the more northern counties of the state, where some years since only upland cotton was raised. In 1884 and 1885 the crop of Florida that found a market was 21,987 bales, against 12,833 from South Carolina. The entire crop of 1885 of all kinds was 12,833 bales for South Carolina, 24,978 for Florida, 2,477 for Georgia, and for other states 1,761 bales. Early in the season the planters of Florida expected full prices for their cotton on an estimated crop of 25,000 bales. But they were disappointed, and were sanguine of better prices, and confiding in the representations of their factors, finally believed that the extraordinary and profitable high prices of the season would be reached later in the season, and with the faith of their convictions, held the cotton, confident of realizing their expectations.

In the early part of 1885 it became evident that the crop would not reach the expectations of the most sanguine, and prices rapidly declined, so that in the spring the prices obtained were but little more than one-half of the price obtained at the same time of the year previous. Notwithstanding this, however, the total value of the Florida crop was not much less than \$2,500,000. It is idle to speculate much on the quantity and value of the growing crop of cotton, and very little reliance can be placed on any estimate made before October or November. The size of the Egyptian and other substitute crops, storms, worms, early frosts, state of the market, condition of trade and the demand for prices, are elements that come in to affect either the size or value of the crop. Although the late dry spring delayed planting and made it difficult to get a good stand, yet the subsequent good weather and the increased acreage more than offset all of this. August, however, put a different aspect on the outlook, and before the month had expired storms and worms had taken one-half of the island crop, and to some extent damaged the crop both in Georgia and Florida. Those who are most familiar with the growing crops estimate the crop of South Carolina at not much over 12,000 bales, against 12,000 of last year. The increased acreage in Florida and Georgia will undoubtedly to a large extent offset the work of the caterpillars and the elements, so that when the returns are in the record for the year will be about 35,000 bales.

Knowledge in youth is wisdom in age.

The Rosadalis Remedy

Is the Great Southern Remedy for the cure of Scrofulous Taint, Rheumatism, White Swelling, Gout, Colic, Constipation, Rheumatism, Nervous Debility, Malaries, and all diseases arising from an impure condition of the blood. Certificates can be presented from many leading Physicians, Ministers, and heads of families throughout the South endorsing ROSADALIS in the highest terms. We are constantly in receipt of certificates of cures from the most reliable sources, and we do not hesitate to recommend it as the best known remedy for the cure of the above diseases.

Judge not of men or things at first sight.

JUSTIN MCCARTHY has made \$30,000 from his "History of Our Own Time."

Cure for Piles.

Piles are frequently cured by a sense of weight in the bowels and lower part of the abdomen, causing the patient to suppose he has some affection of the kidneys or neighboring organs. At times symptoms of indigestion are present, flatulencies, heaviness of the stomach, etc. A moisture, like perspiration, producing a very disagreeable itching, after getting warm, is a common attendant. Blind, bleeding and itching piles yield at once to the application of Dr. Ross's Medical Compound, which acts directly upon the parts affected, absorbing the tumors, allaying the intense itching and effecting a permanent cure. Price 50 cents. Address Dr. Ross's Medical Compound, P. O. Box 50, C. O. T. and Goldsmith & Co.

The Brooklyn Eagle speaks of Roscoe Conkling as "statesman emeritus."

The Fruits of Twenty Years'

practice of such extent and magnitude as probably never before fell to the lot of any man are fully set forth in the unique medical work published by the Peabody Medical Institute, entitled "Science of Life." Read the advertisement.

HORSFORD'S ACID PHOSPHATE.

For Alcoholism.

Dr. J. S. Hollis, Philadelphia, Pa., says: "It is of good service in the troubles arising from alcoholism, and gives satisfaction in my practice."

SCIENTIFIC TRUTH!

REGARDING THE FUNCTIONS OF AN IMPORTANT ORGAN, OF WHICH THE PUBLIC KNOWS BUT LITTLE, WORTHY OF CAREFUL CONSIDERATION.

To the Editor of the Scientific American:

Will you permit us to make known to the public the facts we have learned during the past eight years, concerning disorders of the human kidneys and the organs which diseased kidneys so easily break down? Are we conducting a scientific paper, and are we unscrupulous except in favor of truth? It is needless to say, no medical journal of "code standing" would admit these facts, for very obvious reasons.

H. H. WARNER & CO., Proprietors of "Warner's Safe Cure."

That we may emphasize and clearly explain the relation the kidneys sustain to the general health, and how much is dependent upon them, we propose, metaphorically speaking, to take one from the human body, place it in the wash bowl before us, and examine it for the public benefit.

You will imagine that we have before us a body shaped like a bean, smooth and glistening, about four inches in length, two in width, and one in thickness. It ordinarily weighs in the adult male about five ounces, but is somewhat lighter in the female. A small organ, you say. But understand, the body of the average size man contains about ten quarts of blood, of which every drop passes through these filters or sewers, as they may be called, many times a day as often as through the heart, making a complete revolution in three minutes. From the blood they separate the waste material, working away steadily, night and day, sleeping or waking, tireless in the heart itself, and fully as much vital importance in removing impurities from the blood as the heart, or about 90 barrels each day, or 125 bushels a year! Without a wonder that the kidneys can last any length of time under this prodigious strain, treated and neglected as they are!

We slice this delicate organ open lengthwise with our knife, and will roughly describe its interior. We find it to be of a reddish brown color, soft and easily torn, filled with hundreds of arteries, short and thread-like, radiating from the arteries, ending in a little tuft about midway from the outside opening into a cavity of considerable size, which is called the pelvis or, roughly speaking, a sac, which is for the purpose of holding the water to be further under purification before it passes down from here into the ureters and so on to the outside of the body. These little tubes are called the filters, which do their work locally, and right here is where the disease of the kidneys first begins.

Doing the vast amount of work which they are obliged to, from the slightest irregularity in our habits, from cold, from high living, from stimulants or a thousand and one other causes which occur every day, they become somewhat weakened in their nerve force.

What is the result? Congestion or stoppage of the current of blood in the small blood vessels surrounding them, which become blocked; these delicate membranes are irritated; inflammation is set up, then pus is formed, which collects in the pelvis or sac, the tubes are at first partially, and soon are totally, unable to do their work. The pelvis is unable to contain the waste material, pressing upon the ureters, which here in the pelvis, remember, the blood, which is entering the kidneys, is filtered, passing through this terrible distending pus, for it cannot take any other route.

Stop and think of it for a moment. Do you realize the importance, nay the vital necessity of having the kidneys in order? Can you expect when they are diseased or obstructed, no matter how little, that you can have pure blood and escape disease? It would be just as reasonable to expect it if a pest-house were set across Broadway and countless thousands were compelled to go through its pestilential doors, an escape from contagion and disease, as for one to expect the blood to escape pollution when constantly running through a diseased kidney.

Now, what is the result? Why, that the blood takes up and deposits this poison as it comes along into every organ, into every fibre of muscle, tissue, flesh and bone, from your head to your feet. And whenever, from hereditary influence or otherwise, some part of the body is weaker than another, countless trains of disease are established, such as consumption, in weak lungs, dyspepsia, where there is a delicate stomach; nervousness, insanity, paralysis or heart disease in those who have weak nerves.

The heart must soon feel the effects of the poison, as it requires pure blood to keep it in right action. It increases its stroke in number and force to compensate for the natural stimulus wanting in its conductor to crowd the pure blood through this obstruction, causing pain, palpitation, or an out-of-breath feeling. Unnatural as this forced labor is, the heart must soon fail, becoming weaker and weaker until one day it suddenly stops, and death from apparent "heart disease" is the verdict!

But the medical profession, learned and dignified, call these diseases by high sounding names, treat them alone, and patients die for the arteries are carrying slow death to the affected parts, constantly adding fuel brought from these suppurating, pus-laden kidneys when they are in our wash-bowl, and putrefaction itself, and which should have been cured first.

But this is not all the kidneys have to do; for you must remember that each adult takes about seven pounds of nourishment every twenty-four hours to supply the waste of the body which is constantly going on, a waste equal to the quantity taken. This, too, the kidneys have to separate from the blood with all other decomposing matter.

But you say, "my kidneys are all right. I have no pain in the back." Mistaken man! People die of kidney disease, so had a character that the organs are rotten, and they have never there had a pain nor an ache!

Why? Because the disease begins as we have shown, in the interior of the kidney, where there are few nerves of feeling to convey the sensation of pain. Why this is so we may never know.

When you consider their great work, the delicacy of their structure, the ease with which they are damaged, can you wonder at the ill health of our men and women? Health and long life cannot be expected when so vital an organ is impaired. No wonder some writers say we are degenerating. Don't you see the great, the extreme importance of keeping the machinery in working order? Could the finest engine do even a fractional part of this work, without attention from the engineer? Don't you see how dangerous this hidden disease is? It is lurking about us constantly, without giving any indication of its presence.

The most skillful physicians cannot detect it at times, for the kidneys themselves cannot be examined by any means, which we have our command. Even an analysis of the water, chemically and microscopically, reveals nothing in many cases, even when the kidneys are fairly broken down.

Then look out for them, as disease, no matter where situated, to 93 per cent, as shown by after death examination, has its origin in the breaking down of these secreting tubules in the interior of the kidney.

As you value health, as you desire long life, free from sickness and suffering, give these organs some attention. Keep them in good condition, and thus prevent (as is easily done) all disease.

Warner's Safe Cure, as it becomes year after year better known for its wonderful cures and its power over the kidneys, has done and is doing more to increase the average duration of life than all the physicians and medicines known. Warner's Safe Cure is a true specific, mild but certain, harmless but energetic, and agreeable to the taste.

Take it when sick, as a cure, and never let a month go by if you need it, without taking a few bottles as a preventive, that the kidneys may be kept in proper order, the blood pure, that health and long life may be your blessing.

H. H. WARNER & CO.

Coughs and Hoarseness.—The irritation which induces coughing immediately relieved by use of "Brown's Bronchial Troches." Sold only in boxes.

MOST PERFECT MADE
Prepared by a physician with special regard to health. No Alcohol, Lard or Oil.

A \$1 BOTTLE OF

HUNNICUTT'S RHEUMATIC CURE

Will prove to any one suffering from RHEUMATISM, Gout, Sciatica, Gravel, Neuritis or Kidney Troubles, that it will effect a permanent and speedy cure in every instance.

SOLD BY DRUGGISTS.

Mr. Albert Howell says: A short time ago I suffered terribly with rheumatism. It was impossible to walk, even with crutches. I could not put my foot to the floor. I found no relief from treatment or remedy until I tried Hunnicutt's Rheumatic Cure. Before I had finished taking one bottle I was able to walk comfortably with my crutches, and before I had finished the second bottle my rheumatism was entirely gone. I put my crutches aside and have never felt a twinge of rheumatism since. I am well, and can say my cure is perfect and permanent. It is certainly a wonderful cure.

ALBERT HOWELL.

Atlanta, Ga., January 6, 1886.—Messrs J. M. Hunnicutt & Co.: I have been a sufferer with kidney troubles for seven years, and have been treated by prominent physicians of this state and Atlanta. I have used large quantities of medicines advertised to cure blood and kidney diseases, without success. The pelvis or sac, the tubes are at first partially, and soon are totally, unable to do their work. The pelvis is unable to contain the waste material, pressing upon the ureters, which here in the pelvis, remember, the blood, which is entering the kidneys, is filtered, passing through this terrible distending pus, for it cannot take any other route.

Stop and think of it for a moment. Do you realize the importance, nay the vital necessity of having the kidneys in order? Can you expect when they are diseased or obstructed, no matter how little, that you can have pure blood and escape disease? It would be just as reasonable to expect it if a pest-house were set across Broadway and countless thousands were compelled to go through its pestilential doors, an escape from contagion and disease, as for one to expect the blood to escape pollution when constantly running through a diseased kidney.

Now, what is the result? Why, that the blood takes up and deposits this poison as it comes along into every organ, into every fibre of muscle, tissue, flesh and bone, from your head to your feet. THE CONSTITUTION.

EVENTS FOR TO-DAY, FEBRUARY 17.

AT THE OPERA HOUSE TONIGHT—ALVIN JOSLIN.

THROUGH THE CITY.

Fendall Paragraphs Caught on the Fly by

The Constitution Reporter.

RETURN DAY.—Yesterday was return day

for the United States court, and Chief Clerk

O. C. Fuller was kept busy. He managed to

keep up with the work.

A COMMISSIONER COMMISSIONED.—The gov-

ernor yesterday issued a commission to S. D.

Coleman, member of the board of the commis-

sioners of roads, to take the place of S. E. Loe-

w, who has been elected to the Georgia legis-

lature.

NO CLUE YET.—The detectives who have

been working on the Latham robbery have

been unable, so far, to obtain any clue to the

robber. The money is all marked, so that

they can take the place of S. E. Loe-

w, who has been elected to the Georgia legis-

lature.

WHO SHE WAS.—It now transpires that the

woman who came to Atlanta to see Barton,

the artist, is his wife. She lives in Missouri.

Yesterday she left Atlanta for New York,

where Barton's people live, to obtain money to

pay her husband's fine. Barton declines to

pay it.

HE GROWS BETTER.—Morris B. Frank, the

man who was injured in the collision on the

West Point road near Newnan last week,

is improving rapidly. His physicians

think that he will be able to resume his

work before many days have elapsed.

REWARD OFFERED.—The governor yester-

day offered a reward of \$200 for the arrest of

Andrew Johnson, who is charged with arson,

and his delivery to the sheriff of the county

of Dougherty. The crime with which John-

son is charged was committed in January last.

HE WANTS HIS HORSE.—William G. Meyer,

a Cobb county farmer who lives near the Chat-

tahochee river, was in town yesterday search-

ing for a gray mare which was stolen from his

farm near the Chattahoochee river. Monday

night Mr. Meyer followed the man, he thinks,

to Atlanta.

HE STILL IMPROVES.—Bud Williams, the

man whose leg was badly fractured in the

collision of the cars, is getting well and the

leg is showing healthy signs. Dr. Boring

thinks that Williams will be able to hobble

on crutches in the course of a few

weeks.

HE WENT TO JAIL.—Hawkins, the boy who

stole the clothing from the value given him

by Conductor Rice, was yesterday carried

before Judge Tanner and given a preliminary

hearing. The evidence against Hawkins

was conclusive and he was sent to jail to wait

the coming grand jury.

BACK FROM FLORIDA.—Mr. L. M. Terrill,

superintendent of the railway mail service, has

just returned from a trip over the Florida lines.

He says the oranges here are not as good as

the ones in Florida. The present crop is destroyed,

but he thinks the trees will live. He thinks

the lemon trees are all killed. The younger

orange trees suffered most.

THE FERTILIZER BULLETIN.—The second

bulletin of the department will be issued

this instant and will contain quite a number

of analyses. One million tons have already

been issued by the department, which is an

indication that 100,000 tons of fertilizers

are in the market or will be in a very short

time. The fertilizer men report business good.

HE WILL DIE.—James L. Burnett, the paper

hanger, who fell a few days ago, while hang-

ing paper, is in an extremely critical condition.

He is at his home, 191 Davis street, and is in

an unconscious condition. His physicians

think he will die in a few days. His recovery

from his injuries are of an internal character.

It was thought that the young man had

not been more than painfully injured.

TRIED TO SHOOT THE HUSBAND.—Tom

Watkins attempted to kill Jake Sanders by

shooting him with a double barreled shotgun,

at Marietta, Ga., last night. Sanders is a

POSTMASTER RENFROE.

HE IS THE MAN TO TAKE POST-

MASTER WILSON'S SHOES.

The President Nominates Colonel J. W. Renfro-

What Postmaster Wilson Has to Say About

It—Inspector Booth's Opinion of Mr.

Wilson—Other Interesting Points.

Last night's dispatches announced that

President Cleveland had nominated Col. J. W.

Renfro as postmaster of Atlanta.

Mr. W. T. B. Wilson, the present postmaster,

forwarded his resignation about three weeks

ago to the president, but the matter has been

kept very quiet and but few people in this city

or elsewhere knew of it until Monday, when

the matter leaked out, and has become the

talk of the city.

Mr. Wilson was asked by many if he had re-

signed, but declined to talk.

WHAT MR. WILSON SAID.

Last night THE CONSTITUTION saw Mr. Wil-

son, the present postmaster, at his office. When

informed of the nomination of Mr. Renfro, he

said:

"Well, if it suits the people of Atlanta, it

suits me. I knew he would be appointed, or

at least, I had every reason to believe it."

"Why?"

"Why?"

"Yes, why?"

"That's neither here nor there. I feel great-

ly relieved."

"Mr. Wilson, why did you resign?"

"Simply because I knew it was only a ques-

tion of a very short time when I would have

my head chopped off. I have been in suspense

for many months, and I wanted the matter

settled, and now, thank goodness,

the agony is over. I will go

with a clear conscience, as I was informed by

the postmaster-general that there was no

charges against me, and the office is ready so

that it can be turned over at any time. I have

done my best to please the people, and feel

that I have succeeded."

"What about the appointment of Colonel

Renfro?"

"Of that, I have nothing to say. As I said

before, if it suits the people of Atlanta it

suits me."

"Will any of the men go with you?"

"I do not know, but I shall prevail upon the

people to stay here as long as they can. The

people of Atlanta want their mails regularly,

and I know if the old force come out all at

once, things would get confused."

"After you come out of the office what will

you do?"

"Oh, that is all right. I will go into some-

thing—just what, I can't say, but I am losing

no sleep over that. I made a comfortable liv-

ing before I was appointed postmaster, and I

know I can do it again. My friends need not

worry about me."

"You will go out, when?"

"The thirty-first of March."

"You talk easy?"

"Certainly I do. I feel relieved. I know

it was coming and the sooner the better for

me. When the time comes everything will be

ready to turn over to my successor in good

shape."

NOT AT HOME.

Colonel Renfro was not at home, having

gone off on a hunt, and the reporter failed to

see him. He has felt satisfied for several

days that he would be appointed. Last night

a number of friends called at his home on

Peachtree to congratulate him.

CHIEF INSPECTOR BOOTH SAID YESTER:

"Mr. Wilson has made a most excellent post-

master. He is the only man who was ever

postmaster here who never had trouble. He

is careful and conscientious, and he is a square

up and down man, a hard worker and a man

who looks after every department in the office.

He gives his personal attention to everything

day and night. I know nothing of Colonel

Renfro, but I only hope he will make as good

a postmaster as Mr. Wilson."

PIE-KEEPING POSTMASTERS.

The Inspectors Bringing the Gaitly Ones to

Justice.

AMONG THE MOONSHINERS.

The Returns Coming in and the Collector

Happy.

A few days ago when the reporter called on

Collector Crenshaw and asked the news that

gentleman stated that he had his men out on

the hunt and that he expected good returns.

The returns are all in, and from the unusu-

ally broad smile on the collector's face he is

well satisfied.

Deputy Collector Strong made a raid in

Rabun county and pulled in one large still,

fourteen stands, 1,400 gallons beer. This is

supposed to be the property of Louis F. Har-

vey, Thomas Fontaine and Ezekiel

Lodibler. Harvey was the only one arrest-

ed, and was committed to jail by Commissioner

Gaston, at Gainesville. The same deputy col-

lector captured an eighty-five gallon copper

still, cap and worm, in the same county, about

sixteen miles north of Clarksville; owner un-

known.

Deputy Collector Fite and Deputy Marshal

McDonald captured a still in Douglas county,

near Chapel Hill, and arrested W. F. Van-

cey, who was yesterday given a hearing

before Commissioner Haight, and bound

over in the sum of \$300.

Deputy Collector Chisholm has done big work

in this county. On the night of the 12th he

destroyed a still near Chocoma, the property

of Jasper and Joseph Southern, who were

arrested and committed to jail. Two mules

were seized. On the night of the 15th Deputy

Collector Chisholm, assisted by Officers Milton

and Hardy, seized a one hundred and twenty-

five gallon still, worm and cap, three thousand

gallons beer, seventeen stands, eight gallons

liquor, six bushels meal, two bushels malt and

one hundred gallons low wines. This still be-

longed to the Southern brothers and was not

a great distance from the one first seized.

The same collector on the night of the 12th

instant seized a still in the same county and

arrested J. N. and T. N. Collins, who were

bound over.

Deputy Collector Smith arrested W. K. Glover,

of Douglas county, for illicit work. He

was carried before Commissioner Haight and

bound over.

Yesterday Deputy Collector Fite seized in

this city forty-five pounds of manufactured

liquor, and on the 14th instant Joseph

Dobbs, a colored man, for violation of the in-

ternal revenue laws. Dobbs had the tobacco

concealed in his house.

Trunks and Valises at Cost—Store Leased

The court then adjourned to ten o'clock this morning. One case from the Flint Circuit remains to be argued.

M'LE RHEA.

Rhea is coming! These three words are now repeated all over the city by all those who know the charming artist, and they convey with every promise of delicious and refined pleasure. Every one is waiting impatiently her appearance and gets ready to see her in the three new plays that she brings to Atlanta. Those who have never had the pleasure, but we tell them to go and listen half an hour to the fascinating lady, and you will feel the same way. The magnetism of this all man or woman on the stage and off the stage, as actress or as society woman. Listen to Rhea Love! by the great French author, Victorien Sardou, who made Pature, Prince Andrea, Theodora, all grand plays.

The story is particularly fascinating, and is told in a most entertaining manner. M'Le Rhea appears as a Roman youth, and has achieved a most successful success in a boy role. The production of the new drama is awaited by the theatergoers of Atlanta with very much interest.

We call attention to advertisement in which column of Charleston assembly, which contains many attractions and anyone taking this trip will be well repaid.

ENVIROUS SOULS

Predicted defeat to the Banner with

NO CURE! NO PAY!

INSCRIBED THEREON.

THE "KING BEE" OF A MO-

NOPOLY ASPIRING CO.

Said that the people, after being cured, would de-

mand their money back, and any firm adopting

the rule would fail.

But pinning our faith to the universal honesty of

manhood and womanhood, with an abiding faith

in our off-proved remedy, we continued to float

our banner with "No Cure! No Pay!" thereon,

with unprecedented results.

We authorize merchants dealing in "Guinn's

Pioneer Blood Renewer" to refund the money if it

does not cure all Blood and Skin Diseases, Rheu-

matism, Blood Poison, Glandular Swellings, Scro-

fulous, Malaria and Female complaints.
